Summary

AI Engineer building intelligent retrieval and predictive systems for the logistics & maritime industry.
Specialized in RAG pipelines, Vector Search, MLOps, and Multi-Agent orchestration with production LLMs.

Education

Ho Chi Minh City University of Science

Sept 2021 – Dec 2025

Bachelor of Science in Information Technology - Major: Data Science | GPA: 3.41/4.00

Skills

AI/ML: RAG, Multi-Agent Systems, Vector Search (FAISS, Milvus), LLM (Gemini, Gemma, Ollama), SHAP, Time-Series.
Engineering: Python (FastAPI, Pydantic), PySpark, MongoDB Atlas, MLflow, Optuna, Docker, Git/GitHub.
Cloud: Microsoft Fabric (Data Lake), Google Cloud Platform (GCP).
Languages: English (Professional Working Proficiency), Japanese (Actively studying).

Experience

AI Consultant (Contract)

May 2026 – Present

Safiri Logistics Pty Ltd — Sydney, Australia (Remote)

- Providing independent consulting services in **AI/ML development** and **data engineering** for a unified logistics and supply-chain intelligence platform serving East African markets.
- Designing and optimizing **intelligent data retrieval systems** to improve trade compliance and operational workflows, reducing manual classification workload for logistics operations.
- Collaborating remotely with cross-functional teams across **Australia, Southeast Asia, and the United States**, delivering iterative improvements through bi-weekly progress reports.

Projects

HarborMind | [Agent](#) [ML/DE](#) [Video](#) [Writeup](#)

Apr 2026 - May 2026

- Engineered a **PySpark Medallion pipeline on Microsoft Fabric**, filtering billions of raw AIS satellite pings down to **21.7M+ records** (30 months), then aggregating into **6,000+ unique vessel visits** with **54 engineered features**; enforced strict **OOT temporal splits** (2023-24 Train / 2025 Test).
- Orchestrated MLOps via **MLflow + Optuna** (50+ Bayesian trials), achieving **MedAE 95 min**, **$R^2 = 0.505$** with LightGBM; integrated **SHAP** and **Quantile Regression** (P10/P50/P90) for interpretable uncertainty bounds on a strictly Out-of-Time 2025 holdout set.
- Published an **open-source maritime dataset (21M+ rows)** [on Kaggle](#); full **reproducible ML + Data Engineering pipeline** available in a dedicated [repository](#).
- Architected a **100% on-device Multi-Agent system** powered by **Gemma 4** (Ollama): 3 agents (Navigator/Engineer/Captain) via ReAct pipeline for **slow-steaming decisions**; built-in “Honest AI” escalation when uncertainty is too high. Produced a complete **animated demo video** for the Gemma 4 Good Hackathon.

AITwin | [Production ETL Pipeline & RAG Application](#)

Jan 2026 - Mar 2026

- Architected an object-oriented **Medallion ETL pipeline (Bronze/Silver/Gold)** to ingest and normalize heterogeneous unstructured data (Notion) into a centralized **MongoDB Warehouse**, optimizing schemas for LLM context retrieval.
- Developed a production **AI chatbot** via FastAPI + **Google Gemini** + **MongoDB Atlas Vector Search** (HNSW); applied **Strategy/Singleton patterns** and **exponential backoff** for fault-tolerant ingestion of 10,000+ chunks with SHA-256 deduplication.

Certifications & Awards

NVIDIA-Certified Associate Generative AI LLMs (NCA-GENL) [🔗](#)

Mar 2026

Google Data Analytics Professional Certificate [🔗](#)

Feb 2024

Vietnam Datathon — Top 20 / 200 teams

Dec 2023
